

AGCHEQ

DATA UNIVERSE

AGCHEQ Data Universe

DATA OVERVIEW

The AGCHEQ Q-Data Universe covers the US Wholesale Food Markets and includes Meat, Poultry, Fruit, Vegetable and Dairy products market data.

DATA DESCRIPTION

The AGCHEQ Data Universe consists of Daily recorded trades between Large Growers, Primary Processors or Food Distributors with Institutional Food Service Operators and Retailers. All market data is verified by the US Department of Agriculture (USDA).

The US Wholesale Marketplace is divided into 13 Major-Metropolitan Markets, such as New York's Hunts Point Cooperative Market or the Los Angeles Produce Market. There are more than 60 Aggregate Products (APs) that are comprised of nearly 500,000 actively traded Individual Unique Products (IUPs). These products represent all the major Fresh Food items consumed as determined by the USDA.

PRICE CALCULATION

Prices are calculated & displayed in Normalized Prices, \$/lb. Through reconversion, they are also available in their most commonly used individual industry trading packages. IUPs prices are reported without further calculation. AP prices are equal to the equally weighted aggregate values of all available AP prices within a specific period.

QUICK FACTS
